

Quality Director

Skulle Implants and its innovative GLACE™ technology represent the beginning of a new era in bone implantology. Introduced in 2014, the globally unique GLACE™ technology provides fully non-metallic high-tech bioactive composite implants as an alternative for conventional titanium-based or plain plastic implants. We have worldwide patent portfolio and we are aiming to global market. Our factory is located in Turku, Finland and 80% of our production is exported, mainly to France and Germany.

We are looking for a very experienced Quality Director. We offer an unique possibility to work in an innovative company. Main focus will be in quality supporting all other functions in quality related issues.

We expect you to have

- Bachelors or Master degree or equivalent experience
- Knowledge of ISO 13485 quality system and MDR, FDA regulation as an asset
- At least 4 year experience in a quality management position
- Ability to work both independently and as a team player
- Systematic way of working
- Positive mindset and can do attitude,
- Excellent interpersonal, verbal and written communication and presentation skills in spoken and written English.

Job responsibilities

- Quality assurance products and processes
- Development of quality standards and methods, implementation and documentation
- Quality Director will be a member of management team.

We offer

Interesting career with a new implant technology in a growing company. Competitive benefits.
